Project Details:

Project Name: Christian Data Management System
Description: The **Christian Data Management System** is a secure, web-based platform designed to record, store, and manage sacramental and personal data of Christians within a church organization. The system streamlines the documentation process by allowing authorized users to register individuals, update records, and retrieve biodata based on specific criteria such as parish or sacrament.
Start Date: 05/03/2025
End Date: 01/07/2025

Invoice Breakdown:

Item	Description	Hours/Qty	Rate (USD)	Amount (USD)	Amount (KES)
1. Software Design	UI/UX Design, System Architecture	2 Weeks	\$58.01 / week	\$116.02	15,000

2. Development	Frontend/Backend Development, Testing	4 Months	\$116.02 / month	\$464.11	60,005
3. Maintenance	Bug Fixes, Updates, Support (Monthly)	12 Months	\$162.44 / month	\$162.44 / month for 12 months	21,002
4. Deployment	Hosting (Render, Vercel, Postgres), Domain, Third-party Tools	Postgres Database: Backend:	\$55 / month 4GB (RAM) 1 CPU \$29 / month plus compute costs	\$84 / month	10,860
Total Amount Due				\$826.57	106,867

NB: Payments for **maintenance** and **deployment** are recurrent monthly. This means **\$162.44** and **\$84.00** respectively will be paid each month. Our team will be doing the maintenance for the first 12 months after final delivery, unless the time is extended by a written agreement.
